

Understand data, unlock data insights.

D-QUANTUM – Our intuitively operable and flexibly configurable Data Management tool centralises business data know-how on a single platform and combines it with automatically generated metadata. This is the basis for successful data management.

In future, your data will have consistent definitions throughout the company, traceable responsibilities and greater informative value for all users. D-QUANTUM enables easy access to detailed information of your data systems. **Make your data landscape future-proof and access it from anywhere.**

This is what

D-QUANTUM

can do!

Our vision: We combine the business and technical view on metadata.

The combination of **Business Glossary** and **Data Catalog** offers extensive possibilities to understand your data and generate added value. On this basis, you can add the other D-QUANTUM solutions: Data Contracting, Data Quality Management and Data Request Management.

Data Management anytime and anywhere

- Consistent definitions in the Business Glossary**
create data trust and data literacy
- Powerful search function**
finds maintained data, pages & attachments
- Clear visualisations**
show data lineages and data dependencies
- Up-to-dateness and quality**
ensured e.g. through automated data maintenance
- Data Catalog with automated connection**
of technologies with D-QUANTUM Connect
- Flexible metamodel**
individually suited to the customer data strategy

See how D-QUANTUM works – now in the demo video!

We show you how to bring your metadata into an ordered structure, find data quickly and identify relationships. All this in 3 minutes!

Selection of our customers that already rely on D-QUANTUM

Curious? We are here for you!
