

Data Quality Management

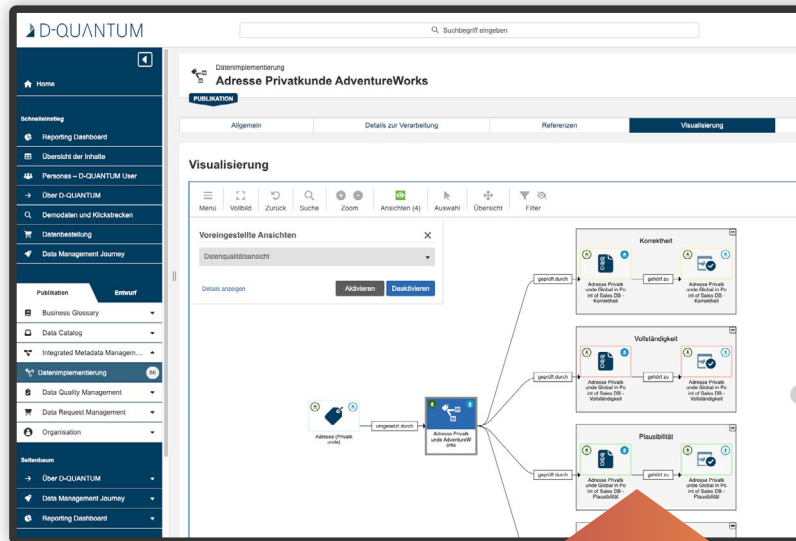

Uniform documentation of all processes for data quality checks

Permanent increase in data and process quality

Through the central availability of DQ-relevant information, D-QUANTUM Data Quality Management increases company-wide transparency about the status of data quality and the effectiveness of derived measures.

Measurable improvement in data quality with D-QUANTUM

Do you know the quality of your data? With D-QUANTUM Data Quality Management, the entire process of data quality assurance is included – from the recording of relevant requirements to the documentation of measurement results. This is followed by the derivation of potential quality deficiencies with associated DQ measures and their implementation.

That's what

can do!

Data Quality Management offers many advantages

Central recording of data quality creates transparency about test results and uncovers inconsistencies in the data

DQ rules and responsibilities ensure optimal evaluation and assurance of data quality

Uniform and comprehensive DQ process enables knowledge transfer and reuse of existing DQ rules

Use of central DQ reporting supports the initiation of DQ measures and measurement of their impact

Defined DQ standards for measuring data quality meet regulatory requirements for data and process quality

Data Quality Management

Do you also ask yourself these questions?

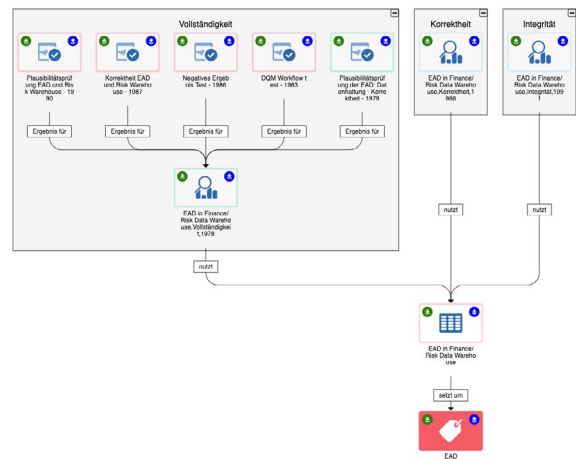

Which quality criteria apply to my data and how are they measured?

How can a company-wide standardisation of the DQ process be achieved in order to fulfil regulatory requirements?

Where can I see the data quality results of my company's data?

Our DQ requirements comply with regulations and audit standards

We offer our customers a tool that was developed based on the most recent regulatory requirements for data and process quality (dimensions – completeness, accuracy, traceability, etc.) of the European Banking Authority. D-QUANTUM enables uniform documentation of the data quality process across all sectors.

Ensure the highest data quality – with D-QUANTUM Data Quality Management!
