# D-QUANTUM

**Ready-to-use solution for your
Data Management & Data Governance**

**Learn
more now!**

# Do you know the value of your data?

**D-QUANTUM, the data management platform, combines business data know-how with metadata generated by automation** and forms the basis for successful data management. This promotes a better and company-wide understanding of data for all users.

D-QUANTUM is **ready for immediate use**. Benefit from our proven Best Practices when it comes to data model, authorisation concept, approval processes and application scenarios.

# Our vision:

**We combine the business and technical view of metadata.**

The combination of **Business Glossary** and **Data Catalog** offers extensive possibilities to understand, trace and generate added value from your data.

### Quickly ready for use

- less configuration and modelling
- start quickly and productively

### Preconfigured and yet customisable

Remain flexible – if needed, the metamodel can be individualised.

### Easy to understand & use

- intuitive operation for every user
- less need for training
- higher user acceptance

### Data Management *Made in Germany*

D-QUANTUM is developed in Germany.

# D-QUANTUM

## Understand data, unlock data insights

**Consistent definitions**
of all key figures in the Business Glossary create data trust
