

Data Catalog

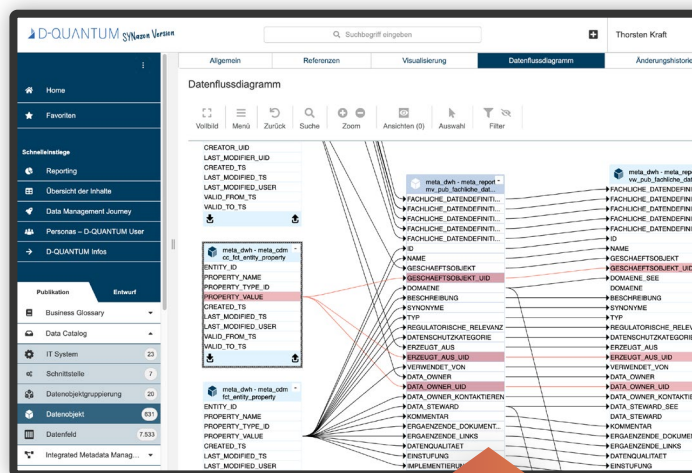

Get out of the data swamp
– find, manage and analyse data

You are looking for a data catalog that gives your data the necessary structure?

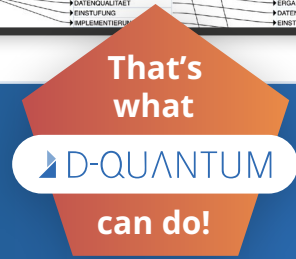

- a data catalog in which you can quickly find what you are looking for,
- whose meta-model can be configured according to your requirements,
- and is intuitively operable for every user?

D-QUANTUM guarantees overview in Data Lake, DWH & Co.

We provide the map to find your way around IT-systems. Our high-performance Data Catalog automatically connects data sources and reliably keeps metadata up-to-date. No matter whether generated through automation or even enriched at a later stage – as a centralised directory of technical metadata, the Data Catalog enables easy access to detailed information about your data systems.

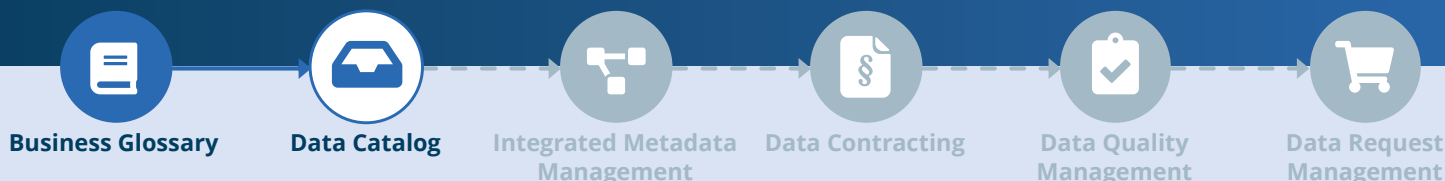

A data catalog for different challenges.
Let's go - search, shop and use data!

- ✓ **Central directory of technical metadata** enables easy access to detailed information of your data landscape
- ✓ **Data Catalog with automated connection** of technologies with D-QUANTUM Connect
- ✓ **High-performance search function** quickly finds data, reports & attachments

- ✓ **Clear visualisations** help to understand complex dependencies and data lineages
- ✓ **Constant up-to-dateness and quality** are ensured through automated data maintenance together with the possibility to enrich data records manually using the intuitive data entry mask
